VASYLI MEDICAL SANDAL-ENHANCED BIOMECHANICAL FUNCTION

VASYLI FOOTWEAR + ORTHOTICS HELP RESTORE NATURAL FOOT FUNCTION

Our feet designed to walk on soft natural surfaces like soil and sand. Today we walk on hard unnatural “manmade” surfaces. The loss of our foot-print causes our feet to compensate unnaturally by rolling in over pronating. Over pronation can lead to number of common lower limb biomechanical conditions. Vasily’s clinically tested and patented orthotic technology– now available in the vasyli medical sandal– is designed to control overpronation. This allows our feet, lower limbs and overall posture to function as nature intended.
